

Testimonials for Babybay Medicare:

Just to let you know your cots have been a real success in our MLU. We initially purchased 5 cots and had one for each room and they have been lovely for our families to use.

The non-clinical appearance has enabled us to have a real home like feel to our MLU and despite the fact they do not look clinical they are robust and user friendly and we have not had any issues at all with them.

The feedback from our families has been really positive. Our neonatal unit has also purchased two for the rooms that prepare woman and their babies for transfer home.

We are now furnishing a transfer lounge close to our MLU so are looking for two cots to enable woman to safely keep their babies close while they prepare for transfer home.

I would highly recommend these cots when trying to achieve a less clinical feel to the birthing environment.

They are such a good product and our families love them.

Thanks,

Lyndsay Durkin

The Royal Surrey County Hospital has used Babybay Medicare cots for a number of years to enable mothers to have their babies close to them and support 'safer sleep' for their babies. We are looking to continue to replace our other cot stock to the Babybay Medicare cots as they are preferred by the mothers in our unit.
